Hello and welcome to another amazing year for STEM across our community!

Thank you for supporting Tulsa Regional STEM Alliance through your contribution to the 2023 Flight Night event. On behalf of the planning committee, we are proud to say it was another record-breaking year!

At nearly $800,000 in net proceeds, Flight Night serves as the most significant source of revenue for Tulsa Regional STEM Alliance allowing us to have such a powerful impact on our community. Together, we are expanding access to excellent STEM experiences in school, out of school, in competition settings, and with mentors, with 200,000+ youth experiences and 900+ educator experiences in 2023 alone!

Your dollars are hard at work! In 2023, the STEM Shoppe – our STEM supplies lending library – saved schools and educators more than $249,379! Another $320,267 in grants was provided to partners for materials, professional learning, and increased access to STEM experiences. That’s a whopping $569,646 in educator and school savings!

Without your generosity, we could not do the great work that inspires and prepares our youth to be the future of STEM. I look forward to seeing you at this year’s Flight Night!

With sincere appreciation,

Levi Patrick, M.Ed.
Executive Director

Save the Date for Flight Night 2024
September 12 • Tulsa Tech Riverside Campus
At Tulsa Regional STEM Alliance, our goal is to ensure access to STEM for ALL youth, and we fulfill this goal by working with educators, youth, and partners in the community.
